

RITIK SINGH RAJPUT

AI Engineer | AI Automation Engineer | Agentic AI Developer

rajputritik7754@gmail.com | +91-9695182497 | linkedin.com/in/ritik-singh-rajput-49b964319

PROFESSIONAL SUMMARY

AI/ML developer with proven expertise building production-ready LLM applications, RAG systems, and intelligent automation workflows. Proficient in Python, FastAPI, LangChain, prompt engineering, and multi-API integrations (Gemini, Groq, Gmail, Google Sheets). LeetCode Hard-level competitive programmer. Passionate about end-to-end AI system design and scalable backends.

TECHNICAL SKILLS

Languages: Python, SQL •

AI/LLM: LLMs, Prompt Engineering, RAG, Agentic AI, Embeddings, Semantic Search •

Backend: LangChain, n8n •

APIs: Gemini API, Groq API, Gmail API, Google Sheets API •

Data: Pandas, NumPy

EDUCATION

B.Tech Computer Science & Engineering (AI) — IIMT College of Engineering, Greater Noida | 2027

Applied AI Intern — 1M1B Green Skill Applied AI Internship | Currently Pursuing

FEATURED PROJECTS

AI Hospital Appointment System | *Python, FastAPI, Agentic AI*

- Automated end-to-end hospital appointment scheduling using Python and FastAPI, streamlining patient booking and intake workflows
- Engineered agentic AI workflows enabling autonomous decision-making across scheduling and patient intake operations
- Reduced patient no-shows and optimized overall hospital operations through intelligent, self-managing scheduling logic
- Achieved 99% system uptime, delivering a reliable and scalable healthcare scheduling platform

AI-Powered Recruitment Platform | *n8n, Gemini API, JavaScript, Google Sheets, Gmail API*

- Designed a multi-role hiring platform with role-specific evaluation rubrics per job category, dynamically applied via Gemini without duplicating workflow logic
- Engineered weighted, multi-criteria resume scoring with Auto-Accept/Human Review/Auto-Reject routing, reducing fully-automated decisions on borderline candidates

Local RAG PDF Assistant | *Python, LangChain, Groq API, FastAPI, FAISS*

- Engineered RAG system enabling context-aware Q&A on PDF documents with <100ms response latency using Groq's ultra-fast LLM inference
- Implemented semantic search via vector embeddings + FAISS indexing; developed scalable FastAPI backend with production-grade error handling

Agentic AI Feedback Management System | *Python, n8n, Gemini API, Google Sheets*

- Developed autonomous feedback analysis system; leveraged Gemini LLM for sentiment analysis, categorization, and insight generation
- Automated workflow execution using n8n; reduced manual feedback processing by 90% while improving accuracy through intelligent categorization

Chat Groq Agent + AI Email Assistant | *Python, Groq API, n8n, Gmail API*

- Built high-performance agentic AI system achieving <100ms response time; implemented multi-step agent workflows with autonomous decision-making
- Created AI email assistant generating professional responses; automated 70% of email drafting while maintaining brand voice and personalization

ACHIEVEMENTS

- Developed 6+ end-to-end AI applications; demonstrated expertise in multi-API integration (10+ APIs) and production deployment
- Campus sustainability audit lead; applied data-driven insights to real-world environmental challenges
